# Packaging Service

2020

## General terms

Our apps are packaged with Cloudpaging Studio for deployment to Microsoft Windows 10 or Windows Server 2016 and above.

All pricing is in Software2 Packaging credits and is the cost per appset (i.e. per app version), unless otherwise shown.

All apps listed in this document are packaged with a default configuration, according to Software2 Packaging Service conventions (provided as a separate document). Bespoke configurations can be provided at an additional credit cost.

## Core subscription

An annual service subscription is required for access to all Software2 Packaging Services. This covers service setup and administration, and project management over the course of the year.

In addition, the following apps are included in our Core subscription, ready to use:

7Zip	Adobe Reader	Audacity	Beast
Blender	BlueJ	ColorVeil	CutePDF Writer
Cygwin	Evernote	FigTree	FileZilla
Firefox	Freemind	G*Power	GeoGebra Classic 6
Gephi	Ghostscript	GIMP	Git
Google Earth Pro	Handbrake	Hot Potatoes	ImageJ
Inkscape	IrfanView	Jalview	JASP
Java JRE	Java SE JDK	jEdit	LTSpice
Makehuman	Notepad++	Pacman	Paint.net
PC-BASIC	PuTTY	Python	QGIS
R for Windows	RStudio	Ruby	Treesize
Turningpoint	Visual Studio Code	VLC Media Player	WinPython
WinSCP	WinVICE		

New versions of the above apps are provided every 3-6 months. Subscribers can also request an update sooner, and we will aim to provide one as soon as possible.

## Free open source software (FOSS)

10 FOSS packages are included with our Core subscription throughout the year at no additional cost. Any FOSS packages we create are shared with all subscribers.

## Plus subscription

In addition to including all of the benefits from our Core subscription, Plus includes 6,000 packaging credits each year, which can be used for any of the following service offerings:

### Adobe CC suite

If you're using Adobe's Named User Licensing or Shared Device Licensing for Creative Cloud, you can add all the following apps to your Plus subscription for 3,000 credits per annum.

Acrobat Pro DC	Adobe Dimension	Adobe Photoshop CC
After Effects CC	Adobe Dreamweaver CC	Adobe Prelude CC
Adobe Animate CC	Adobe Illustrator CC	Adobe Premiere Pro CC
Adobe Audition CC	Adobe InCopy CC	Adobe Rush CC
Adobe Bridge CC	Adobe InDesign CC	Creative Cloud Desktop CC*
Adobe Captivate	Adobe Lightroom CC	
Adobe Character Animator CC	Adobe Media Encoder	

Updated versions of these appsets will be provided twice per year, in January and August.

\*Creative Cloud Desktop CC contains the license and common service components, so must be launched first as a dependency for all other apps.

## Autodesk

The following selection of the most popular Autodesk products can be added to your Plus subscription for 3,000 credits per annum.

3DSMax	AutoCAD	Civil3D
Fusion 360	Inventor	Maya
Moldflow Advisor	Motionbuilder	Mudbox
Navisworks Manage	ReCap Pro	Revit
Autodesk Master License**		

Updated versions of these appsets will be provided twice per year, in January and August.

\*\*Autodesk Master License contains the license and common service components, so must be launched first as a dependency for all other Autodesk apps.

## Packaging menu

Our menu of pre-selected applications offers the best value with discounts available at quieter times of the year. Apps are grouped into bands with the cost in credits as follows:

Band	Off-Peak	Peak (July to September)
A	185 Credits	250 Credits
B	375 Credits	500 Credits
C	750 Credits	1,000 Credits

The cost of an appset is confirmed as soon as the required information to package the app has been provided i.e. before packaging work commences. See 'Media and Licensing' for more information.

**Please note:** New versions of apps / updates are not included; costs are per package. This allows us to offer the best value as you only need to pay for new versions if you need them.

## Service level agreement

Access to Software2 Packaging Services is via our online Packaging portal. Core Apps are available for immediate download in STP format, ready-to-deploy with Cloudpaging.

Requests for packages will be verified within 2 days and the packaged app provided within 1-4 weeks of a verified request. Should you need to mark your request as urgent, Software2 will make all reasonable efforts to deliver a package in the shortest possible timeframe.

## Bespoke packaging

All apps listed in this document are packaged with a default configuration, according to Software2 Packaging Service conventions.

We can also customize any of the apps listed to meet your exact requirements for an additional credit cost. App bandings and any additional credit costs are always confirmed before work commences.

If the app you need is not listed in this document, you can still submit a request via our Packaging Portal and a price will be provided on request, no obligation.

## Media and licensing

Software2 do not sell the software licenses, we simply provide a packaging service. When required, it is the customer's responsibility to provide the installation media and a valid license to be included with each appset.

If access to a license server is required to install or configure an app, this must be provided by the customer. License servers must be contactable over the internet, or via a customer provided VPN connection. If this is not possible, please contact us to discuss alternative arrangements.

**Please note:** discounts can only be applied if the media and license information provided can be used to successfully install and license the app within the discount period.

## Deliverables

Our apps are packaged with Cloudpaging Studio for deployment to Microsoft Windows 10 or Windows Server 2016 and above.

Once packaged, we provide appsets in STP format, ready-to-deploy with Cloudpaging. A recipe and project file (STW) are also provided with each appset, should you wish to make local changes.

## UAT and warranty

Once we deliver your appset, we know you'll want to perform some user acceptance testing, so we include a 90-day warranty as standard. In case of any issues with the appset, simply raise a ticket and we'll resolve any defects. Please note, changes to app configuration (addition of plug-ins etc) will carry an additional credit cost.
